

## Zahra Mandsaurwala Testimonial

(Hasanat High School, Andheri)

**1. Faster Grasping Power:**

I can now learn one page of The Holy Quran in a span of 45 minutes only. Previously it would take me 90 minutes to do the same.

**2. Improved Concentration:**

I used to remain distracted always before coming to Express Learning. I would never listen to whatever the teacher would teach in a class. This would go to such an extent that I had to do everything at home because of my low concentration. After this training, I can now concentrate properly in my class without any distraction.

**3. Sharper Memory:**

My memory has become so sharp that I had gone for a camp for a total span of 2 months. After I came back, my examinations were scheduled immediately. Despite of a 2 months break, I comfortably gave my exams and remembered all the answers very well. This training has sharpened my memory to this extent.

**4. Sharper Intelligence:**

I can now understand the concepts of my studies very well. I have also started answering more in the class which is a sign of my higher intellect. All this was not possible before.

**5. Better Mathematics:**

I have started understanding the techniques of Mathematics much better than before. Earlier I had to do the same sum again and again to get the answer and that would make me feel really frustrated.

**6. Richer Language:**

I have become really good in my English grammar written as well as spoken as I can write my answers better and I have also started using new words. The most important thing is that the fluency of my English has become amazing. I could not do any of the above before.

**7. Faster Reading Speed:**

Previously I used to stumble while reading big words in front of my teacher. Now I can read them fluently without any mistakes. My reading speed has also become very fast as I can read half a book in one hour's time with proper understanding. Earlier I had to repeat the same thing to understand it better.

**8. Deeper Focus:**

Some while back, I was so defocused in my life that I would sleep in the afternoon and would get up directly at the time of sunset. This training has increased my focus so much that now I have started getting up early and I can now focus on my hifz and studies extremely well without sleeping for so long in the afternoon.

**9. Increased Confidence:**

When I was in Dongaon for a camp, at that time to give the Ikhtebaar of the 30th sipara was a huge task for me. Due to the nervousness and because of lack of self-confidence, I would forget everything. Now I have become so confident that I gave my Sana Ula ikhtebaar( oral exam) without feeling scared at all.

**10. Quicker Learning:**

Whatever I have memorized from The Holy Quran has entered my long term memory. Despite of not revising them since months I noticed that all the siparas were so strongly registered in my mind which made my revision much easier.

**11. More Active and Participative:**

I always loved to participate in activities. But after my selection I would start feeling extremely nervous. After joining this training at Express Learning, I have become extremely confident and now I have started participating more in activities.

**12. Greater Academics:**

My marks in all the subjects have improved after this training. Especially in Chemistry and Mathematics I would always score borderline marks. But now despite a 2 month break, I scored very well in all the subjects including Chemistry Mathematics and History Civics.

**13. Greater Creativity:**

My creativity has improved a lot as I have started doing art and craft a lot more than before. My drawing has also become much better than what it was earlier.

**14. Better Sports:**

I was good at playing throwball but now my game has become even better than before.

**15. Greater Interpersonal Skills:**

I was extremely reserved before coming to Express Learning to such an extent that I would not talk to my relatives also. But now my people skills have enhanced and I have now started talking to people.

**16. Heightened Observation:**

I can now observe things much better than before. Recently I went to south and there was a rose garden which had 3000 different kinds of species. I observed them so well that I took a picture of every different specie of this flower.

**17. Expanded Self-Esteem:**

My self-esteem has expanded a lot than what it was earlier. I was not good at Mathematics before and therefore I was thinking of dropping this subject. But this training improved both, my Mathematics as well as my Self-Esteem which made me more positive and ultimately I chose Mathematics and now can do it very well.

**18. Enhanced Intuition:**

Recently we had a class test and I got an intuition that it will get postponed. And that happened in reality.

**19. Better Emotional Control:**

Previously I used to get angry very much on everybody especially on my brother. But now I have started controlling my emotions and my anger and frustration level has reduced to a great extent all thanks to Express Learning.
