Subject: Testimonial Letter

I am so glad that my daughter, Aisha joined The Brain Enrichment Program. She has undergone a tremendous transformation after this training. Her exam fear has completely gone. Before joining here, she would start falling sick every time just a few days before the exam. Now she has become completely fearless. There is an amazing increase in her overall level of Confidence as well as despite being a superb football player, she always use to get nervous in the main game and the coach had to forcibly replace her. The growing Confidence has removed all the last minute anxiety and now she plays very well on the field. Her performance on stage at the Annual day event of the school has also become extraordinary. Previously she would just back out of the show due to the butterflies in her stomach. After getting trained here, she delivered an astounding performance on stage this year as her stage fright was completely gone. I am so proud of her because of that. My daughter was also a very shy child some time back. Now she has converted into an extrovert and does talk very confidently with everyone. Her marks have improved a great deal as she scored incredible marks in the two terms this year. This has been her best performance in the past 3 years. She has now started expressing things to me and her teachers which was not possible before. I am really thankful to Express Learning for changing the future of my child. I have got much more than what I paid for these sessions and I truly recommend every parent to give this gift of a lifetime to their children.
