What 8 sessions, and the magic is done? This was my first reaction when the Brain Enrichment Program was first introduced to me by the team of Express Learning. After completion of the three months course comprising of 8 sessions I am overwhelmed with the outcome. It's a wonderful experience to see my child identify colour cards, UNO cards and currencies with the closed eyes. This activity is an external proof of the positive changes that my child has undergone internally. This has helped instill a lot of confidence and self-esteem in my child helping her to excel in her studies. Her memory has also become very strong which helps her to learn more in less amount of time. In addition to that, her observation skills have also improved tremendously. At times we are consulted personally by the tutors on how to deal in a certain situation with my child. The parenting tips that I have got has helped a lot. The entire module of 2 full days and 6 follow up session is awesome and a great beginning. I do feel that I have received a lot more than what I have invested in this program as the price is absolutely nothing in comparison to my child's transformation.
