Subject: Testimonial Letter

The Brain Enrichment Program at Express Learning has done wonders for my son Mustansir who is in the 10th standard and is giving his boards this year. After starting this training, he has developed a lot of interest in reading books which has helped in gaining a lot of knowledge. Some time back he would hate reading any book. His Concentration level has gone up tremendously as now he focuses completely in the class. In addition to that, his memory has become super sharp which has helped tremendously to remember his studies without any revision. He has also become a lot more intelligent. Plus his Geometry has become a lot better than before as earlier he would get stuck in the middle of any sum but all of that has been taken care of thanks to this superb development here. Another important area of development is that he has started scoring better marks as until now he was scoring around 60% but now he scored 70% in the recent examinations. He could not talk to shop keepers confidently some time back. Now he has become a lot more confidence and can talk to anyone very confidently. Taking tension during examinations was area of concern for us. But after becoming an Express learner, he has become completely stress free in his studies. The cost of this program was very less in comparison to what I got in return and I would truly recommend each and every parent to go ahead with this phenomenal training of this new era.
