Subject: Testimonial Letter

My son, Mustafa always wanted to learn new things in life and so he joined the Brain-Activation Program at Express Learning. I am very happy as a parent to take this decision because he has learnt to see Colour Cards, Uno Cards blindfolded that is with the eyes closed. He can also read words and paragraphs blindfolded. The price of this program is very less compared to the results that I got as my son has become more creative, his learning ability has accelerated, his spellings have improved, his marks have increased, his handwriting have become more neat. Other than that his people skills have become better as now he has opened up much more than before, his confidence has boosted tremendously, his communication skills have developed to a great extent, he can memorize things much faster, studying has become fun for him, his self-esteem and observation have improved a lot, his reading speed and his intellect level has enhanced and he has become very good at his sports, intuition and General Knowledge. Lastly his concentration level has enhanced amazingly. Express Learning has transformed my son's life and I would recommend every parent to undergo this program as it is a life changer.
