Subject: Testimonial Letter

Ever since my son Aliasgar has joined the Brain Enrichment Program, I have found amazing changes inside him. The most fascinating change has been that he can see with his eyes closed that is blindfolded. He can identify colour cards and Uno cards. He can also read words and can identify currency notes with the eyes closed. I have also found a lot of other changes in him like his learning power has increased tremendously, his memory has improved greatly, his calculations in mathematics have become better, his languages like English and Hindi have improved, his confidence has boosted, his focus has become better, his reading speed has become very fast, his interest in studies has increased, his self-esteem has risen, he likes to participate more in activities, his people skills have become better. The most important thing is that his anger has reduced tremendously which makes him argue a lot less than what he used to do before. I truly feel that I have got a lot more than what I had expected. The price of this program is worth much more compared to the results that I got. I recommend every parent to go ahead with this program which will transform their child amazingly into a genius. Express Learning has changed my child's life forever and I am really grateful to their team for that.
