Subject: Testimonial Letter

Ever since my daughter Mariya has joined the Brain Activating Program, I have found amazing changes inside her. The most fascinating change has been is that she can see with the eyes closed that is blindfolded. She can identify colour cards, Uno cards with the eyes closed. I have also found a lot of other changes in her like her Learning Power has become faster, She does not feel tired in school as she can concentrate for a longer period of time, Calculations in Maths have become faster, English has improved as she can speak better, Confidence has boosted, Focus has become better, Memory has risen amazingly, The overall level of interest has increased, She has become more positive, She likes to participate in more activities, People skills have become better and can control her emotions better, Her Marks have improved. I truly feel that I have got a lot more than what I had expected. The price of this program is worth much more compared to the results that I got. I recommend every parent to go ahead with this program which will convert your child amazingly into a better personality.
