Subject: Testimonial Letter

My daughter Alefiya joined the Brain Enrichment Program because of which I have found a lot of changes in her. The most amazing change has been that she can see with the eyes closed specially colour cards, Uno cards and can also read words with the closed eyes. She can also identify the colour cards and the Uno cards at a distance without touching it. After this program, She can concentrate much better in class, Her memory has become sharper, She can think better, Her understanding of Maths has increased, her written English has become better, Her focus has developed in studies, the reading speed has increased, the most important thing is that her confidence has risen immensely, she can also learn her answers very fast, her creativity has become much better than before, her anger has gone down, she can make more friends now and lastly her interest in studies has really developed. I truly feel that this program has changed my child's life. The price of this program is nothing against what I got in return. Every parent should experience this change of the 21<sup>st</sup> century in your child which will make it unique from others.
