Subject: Testimonial Letter

My son Hasan gained a lot after enrolling for the Brain Enrichment Program. Firstly his confidence level has increased a lot as we could see that in his approach towards his studies for the boards which was not present before. His overall stress level for his studies reduced tremendously as before he use to feel a lot of pressure before the exams. Before his distraction level was very high but after this program, his concentration span increased a lot. Along with that his writing skills also improved as he elaborated the answers very well. Before he would cut short his answers. In addition to that, his memory became really strong as he could remember all his answers quite well, which was not the case a few months before. His English Language also improved a great deal. He was very shy but now after coming here, he started answering in the class with confidence. Another important change was that he became more active and started participating in various things which was not present before. His interpersonal skills also rose to a higher level. The most important change was that despite of not scoring very well in the prelims, he scored a staggering 82% in his board exams this year. Lastly his intuition and his sixth sense developed due to which he could identify colour cards with his closed eyes. I am really grateful to the Express Learning team for bringing such a phenomenal transformation in my child and would definitely encourage other parents to enroll their children for these programs.
