Subject: Testimonial Letter

It's simply amazing amazing amazing. Words can't describe the transformation that my daughter Zahabiya has undergone after The Brain Enrichment Program. Not only can she identify things with her closed eyes but she can also concentrate much better than before. She can now focus on things without getting distracted. This did not happen earlier. The thinking process of my daughter has also improved tremendously. She has also become very responsible in all the work that she does. In addition to that her creativity has also increased a lot as she has started painting things. Her intellect level has become very sharp as she understands things much better than before. She can also read very fast as her reading speed has accelerated a lot. She can now finish a novel in 2 days. All this has contributed to her development in her studies as she scored a superb 92% in her boards this year. Since she joint in her 9th standard, her graph of marks has risen higher and higher. Her sportsmanship has developed which has made her better in sports. She has also become a very good leader which has happened because of an overall personality transformation. I am really grateful to Express Learning for all the changes in my child. I truly feel that I have paid a real less amount in comparison to the transformation that my daughter has experienced after coming here. I urge every parent to enroll their child for this amazing life changing experience of the Information age.
