Subject: Testimonial Letter

My daughter has developed amazing skills and has completely transformed after she joined this training. The first thing is that she can recognize Colour cards, Uno cards, visiting cards and any currency note with her closed eyes. She has become very confident as she can answer in the class without hesitation. She was also very shy before but now she has really opened up. In addition to that, she can learn things faster which can be seen in the memorization of answers as well as Hifzul Quran. Her speed of doing hifz has also accelerated. Earlier she could not control her emotions, but now she does not feel bad if somebody hurts her. Before she also use to take a lot of stress for studies. Now she handles it in a very calm and a relaxed manner. Her marks have also increased in Mathematics as she scores twice the marks in comparison to her previous marks. Also her Language has improved as she can understand Hindi much better despite being from Africa. There has also been a great improvement in her spoken English. She has also become more creative and can also observe things very well. Another important development is that her reading speed has increased 3 times. What she could read in 30 minutes, the same she can do it in 10 minutes now. She also use to get distracted very fast with the smallest of the sounds. Now she can completely concentrate in the class without any distraction. I feel I have got a lot more than what I have paid for this training as my daughter has completely changed after coming to Express Learning. I thank their team for the same.
