### Subject: Testimonial Letter

I feel that the price of this program is extremely negligible in comparison to the development that my daughter achieved in these sessions. My daughter Maria joined Express Learning 3 months ago and it was a complete transformational experience for her. The tension that she used to take before the exams has gone away completely. She has also started controlling her emotions very well. Until now she used to get angry very fast on certain things but now she is a lot better in dealing with anger. Maria also used to get distracted very fast until now. This training has helped her in developing her concentration level in her studies. She has developed a much sharper memory which helps her to retain things which she has learnt. In addition to that, her overall level of confidence has developed tremendously which makes her believe in herself. The confidence has reflected in her performance in Mathematics as well as participating in any sport. Not only that, but now she can read faster, understand the languages much better than before. To develop a high level of interest in studies is a very difficult thing, but this has developed in her as she feels more interested in studies which was not the case earlier. I would recommend this program to every parent as my child can grasp things much faster which makes her learn her answers at a higher speed. Now she also gets motivated to get up early in the morning to go to the madrasa. Earlier it was the exact opposite. Plus she has also become very creative in everything and can also talk to people in much better way. I am really grateful to Express Learning for changing the life of my child forever.
