Subject: Testimonial Letter

Husain has undergone an amazing transformation ever since he joined the Brain Enrichment Program. He could not concentrate before for more than 30 minutes at a stretch but now he can pay attention very well. He can identify many things with his eyes closed like colour cards, uno cards, words and currency notes. His misbehavior and tantrums have gone down and now he behaves very well with me. In his school academics also he has shown a dramatic change especially in his languages, letter writing and maths. He has really improved than what he was before. Now he has also become more responsible and completes his work on time. His handwriting and speed of writing has also become better. His memory and the speed of learning has also improved a lot as now he can learn things much faster than before and it saves a lot of time. It also stays in the memory for a longer period of time. I truly feel that I have got a lot more than what I had expected. The price of this program is worth much more than what I paid. After seeing my son's results I recommend every parent reading this letter to make their child participate in this program for shaping your child's future for the good.
